COVID-19 – As at August 2020

One of the public health measures to deal with Covid 19 is the “test, trace, isolate, support” approach. This approach is designed to help us all interrupt chains of transmission in the community by identifying cases of COVID-19, tracing the people who may have become infected by spending time in close contact with them, and then supporting those close contacts to self-isolate, so that if they have the disease they are less likely transmit to it to others.

We therefore need to record your visit to our centre to support the Government in this protocol. The data requested will only be used for the above purposes and will only be passed to Public Health Scotland if requested. Our records will be deleted after an appropriate lapse of time.
